Vision Asset Extreme

ULTRA-RUGGED IP69 4G TRACKER FOR THE HARSHEST SITES

PART No. SL-0014-PT

Built for jet-washes, quarries and recycling yards. The Vision Asset Extreme is sealed to IP69 to survive high-pressure wash-down, dust and vibration, with GPS accuracy under 2 m*, LTE-M / NB-IoT connectivity and a battery that runs for up to 10 years* on non-powered assets.

- Sealed to IP69 for high-pressure wash-down
- Up to 10-year* battery life with monitoring
- GPS accuracy under 2 m*
- LTE-M / NB-IoT low-power 4G
- Magnetic tamper detection with instant alerts

Fix with screws, bolts, rivets or cable ties — no wiring needed

PRODUCT MARKINGS CE

IP69 JET-WASH PROOF	**Up to 10 yrs*** BATTERY MONITORING	**< 2 m*** GPS ACCURACY	**LTE-M / NB-IoT** LOW-POWER 4G
Tamper alert MAGNETIC DETECTION	**15–60 min** MOVING UPDATES	**2 × daily** WHEN STATIONARY	**Heavy duty** PLANT & RECYCLING

Made for assets without a power supply

Trailers · Containers · Plant & machinery · Generators · Skips & bins · Compressors · Lighting towers · Hire & rental kit

Deter & recover
Movement alerts flag theft early so you can act while the trail is warm.

Deploy once
No wiring, no charging — long-life cells keep it reporting for years.

Prove utilisation
Movement and run hours show what is earning and what is idle.

Why Vision Telematics

- **Expert support** — Help from our specialist team
- **Commercial grade** — Built for working fleets and assets
- **One platform** — Vehicles, cameras & assets, one login
- **One partner** — Hardware, connectivity & software

Features & benefits

FEATURE — WHAT IT DOES	BENEFIT — WHAT IT MEANS FOR YOU
IP69 sealing Resists high-pressure, high-temperature wash-down, dust and vibration.	**Survives the toughest sites** Fit it to skips, plant and recycling equipment that gets pressure-washed.
High-precision GNSS Concurrent GPS, GLONASS, Galileo and BeiDou for accurate outdoor positions.	**Find it first time** Pinpoint assets on large sites and in crowded yards.
Magnetic tamper detection Removing the external magnet raises an alert; recovery mode switches to real-time tracking.	**Faster theft response** Give the police a live location instead of a crime number.
Configurable reporting Updates every 15, 30 or 60 minutes while moving and twice a day when stationary.	**The right detail for each asset** Balance visibility and battery life to suit how each asset is used.
Geofences & movement alerts Alerts when assets enter or leave sites, or move out of hours.	**Act before it is gone** Get notified the moment kit leaves the yard or moves when it should not.
Run-hour & utilisation data Movement-based run hours and trip history for every asset.	**Hire and buy less** See what is earning and what sits idle, then right-size the fleet.

How it works

01
Fit it
Screw, bolt, rivet or cable-tie it to the asset in minutes. No wiring and no downtime.

02
It reports in
Positions travel over low-power cellular; records are stored and sent later if coverage drops.

03
You see everything
Live location, movement, geofence and tamper alerts appear on the Vision platform.

04
You act
Out-of-hours movement triggers recovery; utilisation reports show what is idle.

Technical specification

Connectivity

Network	4G LTE-M / NB-IoT

Location

GNSS	Multi-constellation GNSS
Accuracy*	Under 2 m

Technical specification (continued)

Power

Battery life*	Up to 10 years, depending on reporting interval
Battery monitoring	Battery-level reporting

Mechanical & environmental

Ingress protection	IP69
Mounting	Bolt-on for trailers, containers, plant and recycling assets

Sensors & smart features

Tamper detection	Magnetic — instant removal alert
Reporting	Every 15 / 30 / 60 min while moving · twice daily when stationary

Management & security

Configuration	Over-the-air configuration and firmware updates
Data security	AES-256 encryption from device to cloud; HTTPS onward delivery
Platform	Vision platform — same login as your vehicles and cameras
Certifications	CE

In the box & options

In the box

- Vision Asset Extreme tracker
- Fixing screws

* Battery life and accuracy are manufacturer estimates under ideal conditions and depend on temperature, installation, battery choice, reporting frequency, coverage and connected sensors.

** Movement-based: 2 hours of movement a day, 5 days a week, with updates every 3 minutes and uploads every 30 minutes while moving.

Ready to put the Vision Asset Extreme to work?

Talk to our team for a demonstration, a tailored quotation or help choosing the right configuration. We supply and support everything — hardware, connectivity and the Vision platform — from one partner.
